

GREENSKIN™

FOR HVAC APPLICATIONS

Patent Pending Technology

Provides a leak proof continuous membrane for all HVAC penetrations

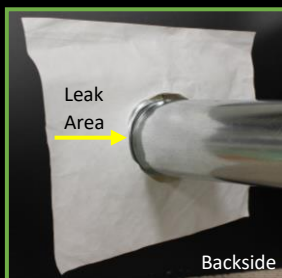

Perfect weather tight poly seal

Made from durable polyethylene material with UV protection

- Easy to use, **flexible** continuous membrane
- No caulking
- No taping joints
- Spacer buttons allows for air flow
- Available in multiple configurations/sizes

CCMC Certified 14005-R

Traditional Method

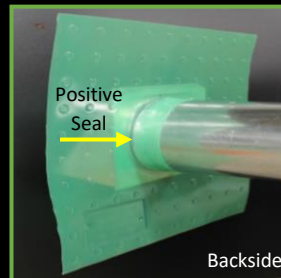

No way to seal building wrap to HVAC pipe

Water travel will leak at pipe and enter wall cavity

GreenSkin™ Method

GREENSKIN™ provides a tight positive seal on the pipe

Once install is complete water travel cannot enter the wall cavity
